

Entrepose scaffolding

04/16/2007

The management and Barclays Private Equity have acquired the Scaff' Holding Group by a secondary MBO from a consortium of funds led by TCR Capital. Capzanine arranged the mezzanine financing.

With consolidated revenues reaching 105 million euros in 2006, Scaff' Holding is the French leader in scaffolding and shoring equipment rental to firms. The group consists of three big names: Entrepose Echafaudages (scaffolding rental), Mills (shoring systems) and Les Echafaudeurs Parisiens (façade renovation in Paris and region).

Thanks to the long experience of Entrepose in scaffolding (70 years) and the unbeatable expertise of Mills in shoring, the Scaff' Holding group has firmly established itself in its sector and is also developing abroad, namely in Latin America and Europe. Scaff' Holding mainly operates in the building industry (renovation and construction), in the industrial sector (industrial site maintenance), Public Works (shoring equipment), historic monuments and events (Monaco Grand Prix).

This group is an opportunity for Capzanine to support a hardened management team by investing in a dynamic firm which has a large fleet of equipment and recognised know-how.

With a tighter regulatory framework, the leading position in France and increasing international development, Scaff' Holding looks set to pursue its growth in years to come.
